

## Printer Calibration for printing of ESR Payment Slips

To print payment slips on your printer, a calibration of the border margins may be required. To calibrate follow these steps:

1. Print this page using the printer settings below
2. On the printed page measure the distances indicated below
3. In LIMMOBI click on your user name in top right corner
4. Choose „Settings“ find „Printer Calibration“
5. Enter the measured values

## Printer Settings

To print this page, as well as when printing payment slips, make sure that the following printer settings are always applied. (Exact names of the properties vary by Operating System type and version)

- „Page Sizing“: Actual size
- „Size“: 100%
- „Scale“: 100%
- „Centering“: Deactivated
- „Scaling“: Deactivated
- „Shrink to fit“: Deactivated

**Calibration-X:** Measure the distance in mm from the line on the right to the border of the page in mm

**Calibration-Y:** Measure the distance in mm from the line below to the bottom of the page in mm
